Les Dunes is an instrumental post-rock trio from Haugesund, Norway. Consisting of members from bands like **The Low Frequency In Stereo**, **Undergrünnen**, **Lumen Drones**, **Helldorado** and **Action & Tension & Space**.

The band consists of Per Andreas Haftorsen on guitar, Morten Jackman on drums and Per Steinar Lie on bass.

The result reminds of the fantastic slow-core era bands of the 90ies, like Codeine who create their own version of **Explosions In The Sky** songs or like Per Steinar Lie claims "it feels like the vibe of the early days of **The Low Frequency In Stereo**".

The music is rooted in a thought of a long freeway drive at night where time stops and the mind flows.

In 2023 **Les Dunes** released its self-titled debut album on german Label Kapitän Platte. On September, 5th the second album **From Etne To The Edge Of Space** will be released with seven new songs: Sharp, cinematic, unstoppable.
